

# **1 AMT-A-1-1**

## **1.1 Kings Report[1]**

Appears to be obituaries, potentially by Kings College Cambridge, in 1954. Notes Turing as not finding interest in Part I of Tripos. Notes his interest in formal logic and ordinal logic. Very little on his work in WW2.

He returned to Kings in 1938. On the Outbreak of war he was invited to join the foreign Office. For his distinguished services during the war he was awarded the OBE. He then turned to the problems involved in the design and use of electronic computing machines.

Turing's work with the Manchester Computer is noted. Notes his long distance running. Notes 1951 election to F.R.S. Notes work on theory of organic growth. Little said on his death.

[H]e was found dead in his house at Wilmslow on Cheshire.
